EXPERIENCE

UX Design Lead

COLSA | Oct 2025 - Present

- Lead product UX across workforce management tools for government contracting workflows, translating complex constraints into intuitive, data-dense experiences for expert users.
- Drive discovery and prioritization through user interviews and usability tests; apply research insights to shape roadmaps with PM and engineering.
- Partner with engineering to define specs, conduct design QA, and contribute front-end UI refinements to catch issues before they ship.
- Reduced unresolved charge errors by 65% by redesigning a charge-tracking tool and integrating authorization updates directly into labor-planning workflows.

UX Designer

COLSA | May 2022 - Oct 2025

- Designed and shipped workflows for charge tracking and labor planning, producing production-ready specs and prototypes that balanced user needs with engineering constraints.

UX Design Intern

COLSA | Jun 2021 - May 2022

- Supported design and iteration of labor management and authorization workflows; created a design system to promote consistency across tools.

UX Design Intern

Invent.us | Jan 2021 - Jun 2021

- Designed a company portal for sales reporting used by 7,000+ real estate agents.

SELECTED PROJECT

WhichYear | Daily photo-guessing game

- Built a Wordle-style daily photo-guessing game as the sole researcher, designer, and developer.
- Grew to 1M+ plays, 5-minute average engagement, and 30% share rate through streamlined onboarding, polished interactions, and easy-to-share results. Acquired in Aug 2025.

EDUCATION

Michigan State University

B.A. in Experience Architecture | 2022 | 4.0 GPA
